

Portugal's telecommunications network base stations

How many base stations in Portugal have 5G?

Since the end of the first half of 2022, ANACOM has been reporting quarterly on progress in the implementation of these latest-generation mobile communications networks. At the end of 1st quarter 2024, according to information reported by operators, there were 9,999 base stations in Portugal with 5G technology.

What is the density of 5G base stations in Portugal?

Regarding the density of 5G base stations in Portugal, it was found that at the end of the 2nd quarter of 2023, the average was approximately one station per 12 km², with an increase in density compared to the previous quarter, which shows the growth of the 5G network in Portugal.

Which operator has installed the most 5G base stations?

Analysing the data by operator, NOS has installed the most 5G base stations (4,705), followed by Vodafone (3,816) and MEO (1,478). In terms of the number of stations installed per operator compared to the previous quarter, Vodafone reported an increase of 18% (+583 stations), NOS 11% (+470 stations) and MEO 1% (+19 stations).

When will 5th generation mobile networks be available in Portugal?

The commercial offer associated with 5th generation mobile networks in Portugal was launched at the end of 2021 with the installation of the first base stations. Since the end of the first half of 2022, ANACOM has been reporting quarterly on progress in the implementation of these latest-generation mobile communications networks.

Are 5G networks growing in Portugal?

While these indicators demonstrate the growth of 5G networks in Portugal, distribution throughout the territory has not been homogeneous, with a greater concentration of stations evident along the western coastal strip, mainly between Viana do Castelo and Setúbal, and along the southern coastal strip (Algarve).

When did Portugal start liberalising the telecoms market?

The progressive liberalisation of the Portuguese market began at the beginning of the 1990s through the creation of the Portuguese Institute for Communications (ICP). Through a combination of specific deadlines for liberalisation and entry mechanisms for new market players, Portugal's telecoms scene was successfully opened up to competition.
