

Power generation in Jamaica

What type of energy is used in Jamaica?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Jamaica: How much of the country's energy comes from nuclear power?

How can energy services companies improve energy use in Jamaica?

There are huge opportunities for increasing the efficiency of electricity use in Jamaica, particularly using an Energy Services Company (ESCO) framework. ESCOs are Energy Services Companies who bundle a number of energy services to form an energy saving project.

How much electricity does Jamaica have?

As of 2020, Jamaica's installed electrical capacity was 1156 MW, supplied primarily by fossil fuels (83.73%), followed by wind (8.82%), solar (4.93%) and hydro power (2.52%).

Why is the Jamaican electricity sector important?

It also forms part of a broader exercise to develop a framework for benchmarking the Jamaican electricity sector. The performance of Jamaica's electricity industry is crucial for several reasons. Firstly, there is a high degree of correlation between electricity consumption and gross domestic product (GDP).

Does Jamaica have a monopoly on electricity?

This is a list of electricity-generating power stations in Jamaica, sorted by type and name. In Jamaica, the Jamaica Public Service Company (JPS) has a monopoly on the "transmission, distribution and supply of electricity". However, JPS does not have a monopoly on electricity generation.

How is energy productivity measured in Jamaica?

Performance on the generation side of the electricity industry is measured in terms of energy productivity defined in Equation 1. In the case of Jamaica, total net generation by the industry is made up of net generation by the JPSCo and by IPPs. The energy sources from which electricity is generated include thermal, hydro and wind.

The future in Jamaica will see many, going without this commodity. Unless some cunning deceptive political wit comes along and says, hey, vote for me, and I'll secure for you ...

The Jamaica Public Service Company Limited (JPS) is the only electricity utility in Jamaica. As a single buyer, it owns and operates the island's transmission and distribution networks as a ...
