What is the best sine wave inverter?

Samlex PST-2000-12 Pure Sine Wave Inverter - Most Reliable The Samlex PST-2000-12 is our pick as the most reliable pure sine wave inverter that you could buy. It's constructed with high-quality materials, safety certified, UL-listed, and has a 3-year warranty. This could be the only sine inverter you'd need for several years.

Why should you use a pure sine wave inverter?

Pure sine wave inverters produce stable power with low harmonic distortion you can safely use with medical equipment. Such clean power output buys you peace of mind knowing that your expensive devices are safe from power disruptions.

Should I buy a modified sine wave inverter?

When it comes to solar array inverters, you do not want to buy a modified sine wave inverter. Contrary to pure sine wave inverters, modified sine wave inverters only attempt to mimic a sine wave, which can result in regular and bad disruptions to the grid and to your experience.

Are pure sine wave inverters safe?

With a unit as integral to the maintenance and production of your energy supply, it's important that they are as safe to use as possible. Pure sine wave inverters typically come with several in-built protection systems to ensure their own longevity, as well as the longevity and security of your solar panels and appliances.

What equipment can a pure sine wave inverter work with?

Unlike modified sine wave inverters that can interfere with certain devices, pure sine wave inverters work properly with all types of equipment. This general compatibility includes sensitive medical equipment like CPAP machines, precision tools, variable speed motors, laser printers, and newer appliances with digital controls.

Do you need a sine wave inverter for solar panels?

You need a pure sine wave inverter if you plan to install solar panels on your roof or RV. Most appliances in your home use AC power, so you need it to convert the DC power that solar panels produce to AC power. It also brings up the voltage to the grid level.
