

Central receiver systems are one of the most promising large-scale solar energy generation technologies. The core component of these systems is a heliostat field.

This study classified three design methodologies: thermal insulation (CSG I), solar transmittance (CSG II) and solar interception (CSG III), and conducted a two-year comparative evaluation ...

2 days ago· 3I Atlas is a newly discovered interstellar comet traveling through our solar system at a record breaking speed of about 209,000 km/h, making it the fastest of its kind ever observed. Unlike ...

The Bhargavastra counter-drone system was developed by the Solar Defence and Aerospace Limited, a subsidiary of the Solar Group in response to the increasing dangers that the Indian Army faces from weaponized drones and loitering munitions. The project began after analyzing the Russian invasion of Ukraine, which involved the use of loitering munition and swarm drones, and the Nagorno-Karabakh conflict between Azerbaijan and Armenia. The Bhargavastra counter-dron...

1 day ago· Scientist Watching to See If Mysterious Object Visiting Our Solar System Releases Any Probes "It could either visit us or release some mini-probes that arrive to Earth and ...

A micro-missile-based counter-drone system designed to detect and eliminate hostile drones, including drone swarms, using guided munitions. ...

Strange objects from other star systems are passing through our solar system, and now scientists are racing to intercept them before they disappear forever.

A Strange Object Has Entered Our Solar System--and One Scientist Says It May Be an Alien Craft If it's not an asteroid or a comet, it might be something stranger.

An optimal solution with least deviation from the ideal design was obtained. In this work, a theoretical model based on opto-geometric and thermodynamic analyses of Solar Dish ...

Tiedong Liu, Fengbin Song, Shengqun Liu and Xiancan Zhu, 2012, Light interception and radiation use efficiency response to narrow-wide row planting patterns in maize.

Different frequencies and types of bursts have different energy multipliers compared with the calm state. For example, type II bursts have very high intensity, usually exceeding the quiet solar ...

Fractional light interception (f) during the vegetative period was up to 26% greater under 680 $\mu\text{mol mol}^{-1}$

CO₂ than in the control treatment, but ...

The intercept factor is the ratio of the energy intercepted by the receiver tube to the energy reflected by the highly polished mirror or aluminum reflector sheet. It depends on many factors ...

NASA's Hubble Space Telescope has captured the sharpest-ever view of the interstellar comet 3I/ATLAS, revealing clues about its icy nucleus, high-speed journey, and ...

2 days ago; 3I Atlas is a newly discovered interstellar comet traveling through our solar system at a record breaking speed of about 209,000 km/h, making it the fastest of its kind ever observed. ...

The system's unique capabilities were validated in a series of rigorous tests, demonstrating successful interceptions of various projectile ...

Harvard physicist suggests that the interstellar object 3I/ATLAS may be an alien probe on a reconnaissance mission, challenging our understanding of cosmic visitors.

The Bhargavastra counter-drone system was developed by the Solar Defence and Aerospace Limited, a subsidiary of the Solar Group in response to the increasing dangers that the Indian ...

NASA scientists have confirmed that a mysterious object shooting toward us through the solar system is an "interstellar object" -- only the third of its kind ever seen. Experts have ...

This document provides an overview of a seminar on light interception by trees in relation to multistoried cropping systems. It discusses the introduction and benefits of multistoried ...

In late 2017, a mysterious object tore through our solar system at breakneck speed. Astronomers scrambled to observe the fast moving body using the world's most ...

A better canopy structure can result in better solar radiation interception, and consequently affect light availability. The alternating wide row spacings between double rows in P1 and P2 ...

A micro-missile-based counter-drone system designed to detect and eliminate hostile drones, including drone swarms, using guided munitions. Developed by: Solar Defence ...

The InterceptorTM is a barrier and conveyor belt system that concentrates and extracts plastic from rivers. The flow path is uninterrupted due to the catamaran design, which allows plastic to ...

The first to propose such a relation was Monteith in 1977, who plotted biomass versus accumulated solar radiation intercepted by different C3 crops (sugar beets, potatoes, ...

Solar Interception System

NASA scientists have confirmed that a mysterious object shooting toward us through the solar system is an "interstellar object" -- only the third ...
