

Solar Panel Cooperation

What is a solar co-op?

A solar co-op is made up of individuals, businesses, or both, partnering up to meet their shared energy needs and typically receiving bulk discounts. This is not to be confused with community solar, which is defined as any solar project or purchasing program in which the benefits of a single solar array or project flow to multiple customers.

Are there other organizations that facilitate solar co-ops?

In addition to Solar United Neighbors, there are several other organizations that facilitate solar co-ops, like Solarize and Solar Crowd Source. Solar co-ops enable members to easily learn about all aspects of solar in partnership with their fellow co-op members.

Can a solar co-op save money?

Joining together with other people who also want to go solar can result in saved money through the bulk purchase of solar technologies. That's the logic behind solar cooperatives, or co-ops. A solar co-op is made up of individuals, businesses, or both, partnering up to meet their shared energy needs and typically receiving bulk discounts.

Why should you join a solar co-op?

Affordability- Similar to community solar projects, acting together as a group can help save homeowners money in attracting competitive bids from solar installers. **Flexibility -** Solar co-ops are free to join and have no binding commitments.

Is a solar co-op right for You?

If a solar co-op sounds like the right fit for you, find one in your community--or talk to your neighbors about starting a new one. Check out our solar energy resources for consumers to learn more about how you can take advantage of the benefits of solar energy.

What are the benefits of a solar co-op?

Here are some of the most common benefits of using a solar co-op: **Responsive to local needs-** Solar co-ops provide members peace of mind because they're not going through the process alone. Co-ops respond to the needs of the community, working with municipal governments to streamline and improve permitting processes.
