

Solar System Assembly Guide

What is included in a solar system kit?

This kit includes full-color step-by-step illustrated assembly instructions. +Build a colorful model of the solar system. +Wind-up engine sets your planets in motion around the sun - no batteries required +Learn about the planets' celestial orbits.

How do you make a solar system model?

Build a mechanical model of the solar system including the sun and eight planets (also known as an orrery), wind it up, and watch the planets revolve around the sun. Assemble this complex machine using snap-together plastic parts to learn how the gears and wind-up mechanism work to spin the model.

What can I add to my solar system model?

In addition to moons, you can also add asteroids and other celestial bodies to your solar system model. Small beads or painted pebbles can be used to represent asteroids, comets, or dwarf planets like Pluto. Place these smaller objects strategically throughout your model to create a dynamic and engaging representation of our solar system.

How do I showcase my solar system model?

Here are some tips on how to effectively showcase your solar system model: Choose a Prominent Location: Select a visible and easily accessible location to display your solar system model. This could be a shelf, a bookcase, a desk, or a dedicated display area in your home or classroom.
