

# Solar energy design price in Vietnam

How much does a solar project cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MIOT) recently introduced new ceiling prices for solar and wind projects that sell electricity to Electricity of Vietnam (EVN). The ceiling price for ground-mounted solar has been slashed from \$0.0709/kWh to \$0.0502/kWh, threatening the financial viability of large-scale solar projects.

How much does a ground-mounted solar project cost in Vietnam?

The ceiling price for ground-mounted solar has been slashed from \$0.0709/kWh to \$0.0502/kWh, threatening the financial viability of large-scale solar projects. Vietnam's Ministry of Industry and Trade (MIOT) has set new price ceilings for the so-called "transitional" wind and solar projects.

What are Vietnam's 'transitional' wind and solar projects?

Vietnam's Ministry of Industry and Trade (MIOT) has set new price ceilings for the so-called "transitional" wind and solar projects. These are renewable energy projects that failed to qualify for the expired feed-in tariff scheme and will now be allowed to sell power to Vietnamese utility EVN through power purchase agreements (PPAs).

How much solar power does Vietnam have?

There has been no official confirmation from the Vietnamese government thus far. According to Apricum's latest data, the country has installed around 18.47 GW of solar capacity. This content is protected by copyright and may not be reused.

How much does a solar project cost?

The MIOT reduced the ceiling price for ground-mounted solar projects from \$0.0709/kWh to \$0.0502/kWh, a 29% decrease. The ceiling price for onshore wind decreased by 21%, from \$0.085/kWh to \$0.0672/kWh.

Why should Vietnam invest in solar power?

Vietnam can leverage domestic solar manufacturing to meet domestic demand, implement direct power purchase agreements (DPPAs) enabling private renewable supplies, accelerate grid and battery storage infrastructure, and avoid costly LNG imports by prioritizing renewables.

In the second installment of our series "Energy in ASEAN: The Essentials," we will take a deeper dive into the solar energy market in Vietnam. In this article, we will provide a ...

H&#192; NOI -- The Ministry of Industry and Trade (MoIT) has officially issued the 2025 electricity generation price ceiling framework for various types of power plants, including hydropower, ...

This legal update signals a significant step forward in aligning Vietnam's renewable energy sector with

# Solar energy design price in Vietnam

standardized pricing mechanisms and broader energy policy goals.

The ceiling prices are a response to Circular 15/2022/TT-BCT released in October 2022, which serves as the framework for Vietnam Electricity (EVN) to enter into tariff ...

4 days ago - The Ministry of Industry and Trade has just issued decisions approving the electricity generation price framework for hydropower plants, natural gas-fired combined cycle ...

9 YRS Vietnam Green Energy company Globally compete and actively participate in the development and expansion of renewable energy in the global market, understand the ...

H&#192; NOI -- The Ministry of Industry and Trade (MoIT) has officially issued the 2025 electricity generation price ceiling framework for various types of power ...

Based in Vietnam, it has extensive experience in the design, construction, and operation of solar roof power systems to provide clean energy for business customers with competitive prices to ...

On average, the installation cost for a household solar panel system is around 14,000,000 VND. This estimate is based on a monthly electricity usage of 2,000,000 VND, an ...

Market Overview Vietnam Solar Energy Market is witnessing significant growth in recent years due to various factors such as increasing government support, favorable policies, and growing ...

This new price framework provides clarity and a regulatory foundation for the development and investment in solar power projects across Vietnam. It distinguishes between ...

Abstract Vietnam has pledged to reduce methane emissions by 30%, increase renewable energy utilization, and decrease coal-based electrical power, with a goal of achieving net-zero carbon ...

Solar power farm in Cam Ranh, Vietnam. (Photo: iStock) Vietnam is emerging as a significant player in the renewable energy market, attracting multinational corporations with its ...

There will be opportunities for foreign investors in areas such as rooftop solar infrastructure, construction and maintenance, energy storage and ...

Vietnamese authorities are looking to retroactively revise purchase prices for 173 solar and wind projects, reducing revenues by 25% to 46%, risking bankruptcies across the ...

One of the reasons for Vietnam's solar growth is its massive solar energy potential, particularly in its southern and central regions. Vietnam enjoys average solar irradiation levels between 4.0 ...

## Solar energy design price in Vietnam

Vietnam's Ministry of Industry and Trade (MIOT) has set new price ceilings for the so-called "transitional" wind and solar projects.
