

# Somaliland's new outdoor power supply

Does Somaliland need a reliable energy supply?

Somaliland's government acknowledges the lack of reliable energy provision as a major constraint to development. The government plans to ensure that all citizens have access to affordable energy from local and renewable sources by 2030. This goal is ambitious.

Does Somaliland need a solar grid?

Somaliland has one of the world's highest energy prices punctuated with frequent and often long-lasting power cuts. So far, only limited investments have been made into the generation of clean energy, among them a solar mini grid in Berbera, funded by the Abu Dhabi Fund for Development.

What is the power master plan for the government of Somaliland?

The main objective of the Power Master Plan for the Government of Somaliland (GoSL) is to produce a roadmap to guide the introduction and establishment of affordable, safe, reliable, and environmentally friendly electricity supply systems in the country."

Can a microgrid increase solar power in Somaliland?

This project in Somaliland is one of the first in the world to use the company's patented Maximum Inverter Power Tracking (MIPT) technology to increase the share of solar power in microgrids. Hosted by BEC utility, Somaliland's power grid supplying the city of Berbera is being monitored and controlled using microgrid technology.

Why is energy so expensive in Somaliland?

The government plans to ensure that all citizens have access to affordable energy from local and renewable sources by 2030. This goal is ambitious. Electricity across Somaliland is privatised and relies on fossil fuel, mainly diesel, which is imported from the Arabian peninsula. Energy is, therefore, costly and unsustainable.

Why is infrastructure development so important in Somaliland?

Infrastructure development carries modernity's promise of progress and development. But it relies on affordable and reliable energy. That is what is lacking for most of Somaliland's residents. The electricity access rate is estimated at 15%.

This was considered a significant step towards providing energy to poorer households and reducing Somaliland's dependence on fossil fuels. But immediately after the ...
