

Spanish power and gas provider Naturgy has acquired its first PV project in Australia - the Cunderdin hybrid solar + storage project east of ...

Spain has set an ambitious goal of achieving 22.5 GW of large-scale energy storage capacity by 2030. The Spanish government has allocated EUR150 million to catalyze energy ...

In this report, we delve into the developments in the regulatory framework of the Spanish electricity system and explore the potential of Spain's battery energy storage systems ...

A Spanish hybrid plant from Acciona that features battery storage paired with a wind farm. Image: Acciona. Spain's government has approved an energy storage strategy that ...

It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage. The program supports ...

Renewable energy will cover almost half of the world's electricity demand by 2030, according to the Renewables 2024 report by the International Energy Agency (IEA), thanks to ...

Enlight Renewable Energy has signed financing agreements totalling \$310m for the hybridisation of the Gecama project in Spain. The project will integrate a solar array and utility ...

The aid is targeted at various storage technologies, including stand-alone battery systems, reversible pumped hydro, thermal storage, and hybrid systems integrated with ...

Equitix lands EUR271 million from Banco Santander to power hybrid renewable projects in Spain, merging wind, solar, and battery storage for a ...

This agreement will allow Zelestra to build a project consisting of 170 MWdc of solar capacity and 400 MWh of battery storage located in Trujillo, Extremadura, Spain.

The global energy storage market is growing strongly. Spain, as an important member of the European renewable energy market, the energy storage industry is booming, and Spanish ...

More than 182 MW of the battery energy storage systems (BESS) highlighted in Spain's Official State Gazette (BOE) are for hybridization with existing solar and wind ...

March 2023 was an interesting month for Spanish solar with rather significant implications for how future

projects should be designed and built. ...

The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms. Spain's electricity grid already ...

First solar plus battery energy storage PPA signed in the Spanish market will allow Zelestra to build a 170 MWdc solar and 400 MWh battery storage hybrid project to supply ...

The Gecama hybrid project will be Spain's largest renewable energy complex of its kind and contribute significantly to the country's storage infrastructure, aligning with the ...

It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy ...

A Spanish hybrid plant developed by Acciona that features battery storage paired with a wind farm. Image: Acciona. The first of Spain's new renewable energy auctions is set to ...

More than 182 MW of the battery energy storage systems (BESS) highlighted in Spain's Official State Gazette (BOE) are for hybridization with ...

The review comprehensively examines hybrid renewable energy systems that combine solar and wind energy technologies, focusing on their current challenges, ...

Equitix announces the acquisition of a portfolio of two hybridized renewable energy projects in Spain. The portfolio contains; two operational ...

1 day ago; Grenergy has secured a senior non-recourse financing agreement worth US\$270 million for Phase 6 of its flagship project, Oasis de Atacama.

Spain's MITECO issued positive EIS for three energy storage projects during the week starting Nov. 9, 2024. The Gecama site features 250.08 MW of solar generation capacity ...

The FV Revilla-Vallejera Hybrid project in Burgos combines a 27.46 MW battery storage module with the existing 44.199 MW photovoltaic installation. This project has already ...
