

The maximum power consumption of a typical outdoor power supply

How much power can a Philips Hue outdoor power supply withstand?

The bottom line is that the maximum power is a little more than 70 watts, much more than the 40 watt power supply from Philips Hue should be able to withstand. But with a measuring device I was able to make interesting findings. The outdoor power supply seems to have enough reserves.

How do I calculate my maximum power output during a camping trip?

To calculate your maximum power output, start by making a list of all the devices you plan to use simultaneously during your camping trip. For instance, you might want to charge your smartphone while powering a portable fan and a small LED light.

How many Watts should a power station consume?

For example, if your devices consume a total of 100 watts continuously and 190 watts at peak, opt for a power station with a maximum output of at least 250 watts to be on the safe side. This provides a buffer for any unexpected power demands or fluctuations in your devices' power consumption.

How much power does an oupes portable power station use?

For example, an OUPES portable power station with a 1,000Wh capacity theoretically supplies 1,000 watts for one hour or 100 watts for ten hours. However, this is only the theoretical limit--real-world usage often differs. To estimate runtime, you must first determine the power draw of your devices.

How much power does a camping device use?

You can typically find this information on the device itself or in its user manual. Popular camping devices like LED lights, smartphones, and portable fans usually consume between 5-50 watts. In contrast, more power-hungry equipment like laptops, electric grills, and mini-refrigerators can consume up to 150 watts or more.

How much power do you need for a camping trip?

For small, off-grid camping trips, you don't need much: A simple power pack or small solar panel can be more than enough! To calculate your maximum power output, start by making a list of all the devices you plan to use simultaneously during your camping trip.
