

# Turkish household energy storage power supply wholesale price

How does electricity cost in Turkey?

Electricity prices are state-controlled, but wholesale prices are heavily influenced by the cost of imported gas. Each year, about 300 terawatt-hours (TWh) of electricity is used, which is almost a quarter of the total energy used in Turkey.

Is Turkey a regulated electricity market?

Turkey has a semi-liberalized and moderately regulated market. Energy Exchange Istanbul (EXIST) is Turkey's electricity spot market, which manages day-ahead and intraday markets where 40% of electricity is traded among 854 market participants. EXIST's website features electricity prices in real time.

Are electricity prices rising in Turkey?

Year-over-year, Electricity prices for households have surged by 38.8%. Current Electricity prices in Turkey are detailed in the Energy Prices & Markets in Turkey Report, which provides comprehensive pricing and market insights for electricity as well as other major energy commodities in Turkey.

How much electricity does Turkey use a year?

Each year, about 300 terawatt-hours (TWh) of electricity is used, which is almost a quarter of the total energy used in Turkey. On average, about four hundred grams of carbon dioxide is emitted per kilowatt-hour of electricity generated (400 gCO<sub>2</sub> /kWh); this carbon intensity is slightly less than the global average.

How much energy does Turkey have?

Turkey currently has approximately 31.6 GW of hydroelectric, 25.75 GW of natural gas (NG), 21.3 GW of coal, 11.45 GW of wind, 9.93 GW of solar, 1.7 GW of geothermal, and approximately 2 GW of biomass power plant installed capacity.

Will Turkish Electricity be cheaper than EU electricity?

Although Turkish electricity is likely to be cheaper than that generated in the EU, the impact of the CBAM is unclear as of 2021. Kırklareli gas power plant, due to be completed late 2025, is between demand in Istanbul and the border with the EU.
