

Typical Behind-the-meter Energy Storage Project in Hungary

Hungarian authorities launched the tender for grid-scale batteries on January 15 and received offers until February 5. The winning bidders were ...

Electricity can be a significant cost for large commercial/industrial consumers, and optimal dispatch of behind-the-meter battery storage systems (BTM...

With the latest system coming online on 19 June, MET Group and Dunamenti Power Station are stepping up their support for Hungary's shift to ...

BTM storage is a flexible demand-side resource capable of Storing electric generation during periods of low electric demand and excess solar generation Discharging ...

Swiss-based energy company MET Group has officially inaugurated Hungary's largest standalone battery energy storage system (BESS) at its Dunamenti Power Station in ...

MET Dunai Energiatároló, a member of the Swiss-based MET Group, is building an energy storage system with a total nominal capacity of 40 megawatts (MW) and a storage ...

Read about the key role played by the Hungarian Energy and Public Utility Regulatory Authority (MEKH) in facilitating the battery energy storage in Hungary through developing detailed rules ...

The intent of the new paper is to inform and assist policymakers, utilities and other stakeholders in establishing clear expectations and goals for behind-the-meter energy storage, which would ...

The European Commission has approved a EUR1.1 billion (approximately HUF 436 billion) Hungarian scheme to support electricity storage facilities to foster the transition to a net-zero ...

In the realm of energy storage, 1. the distinction between front-of-the-meter and behind-the-meter systems is foundational. 2. Front-of-the-meter energy storage refers to utility ...

MET Dunai Energiatároló, a member of the Swiss-based MET Group, is building an energy storage system with a total nominal capacity of ...

Hungarian authorities launched the tender for grid-scale batteries on January 15 and received offers until February 5. The winning bidders were selected a few days ago. They ...

Typical Behind-the-meter Energy Storage Project in Hungary

MET Group has inaugurated Hungary's largest standalone battery energy storage system (BESS) at the Dunamenti Power Station in Székesfehérvár, further advancing efforts ...

Behind-the-meter (BtM) flexibility is set to transform how we manage energy in Great Britain. Our latest blog explores the growing role of BtM assets--such as electric ...

Energy storage systems (ESSs) can help make the most of the opportunities and mitigate the potential challenges. Hence, the installed capacity of ESSs is rapidly increasing, ...

With this latest BESS plant which went into operation today, MET Group and the Dunamenti Power Station are further strengthening their contribution to the energy transition in ...

How the Program Works This new program launched January 1, 2022 to promote energy storage deployment. This program offers an upfront deployment incentive and an ongoing performance ...

The Hungary panel discussion at the event. Image: Solar Media. Hungary's subsidy scheme for energy storage will drive huge growth in battery energy storage system ...

Welcome to the 1st edition of our BTM (Behind-The-Meter) Series! We're turning our attention to the stationary energy storage markets & ...

With the latest system coming online on 19 June, MET Group and Dunamenti Power Station are stepping up their support for Hungary's shift to cleaner energy. Large ...

In 2024, MET Group acquired Comax, a French operator and developer of energy storage systems, significantly expanding its capabilities in this area. The company is also ...

Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

In contrast, behind the meter battery installations often must take into consideration the structure of the distribution utility service cost schedule ...
