

Can Uganda achieve net zero emissions by 2065?

Achieving net zero emissions by 2065 would require reaching USD 8 billion in annual clean energy investments in Uganda by the end of the decade, with almost 90% of this financing directed towards projects focused on improving energy access and expanding clean energy capacity, according to the analysis.

What is Uganda's new energy plan?

Uganda's Ministry of Energy and Mineral Development has issued a new plan for the country's energy sector that sets out a robust pathway to meet economic growth and development objectives in a secure, affordable and sustainable way.

How can Uganda improve energy access?

Uganda has a large community of international development partners in the energy sector. Better co-ordination and management of international donor support to facilitate improved energy access and better value for money and the reduction of duplication would benefit Uganda significantly.

What is Uganda's energy transition plan?

Uganda's grid is already 99% powered by renewables. Under the new roadmap, electricity generation grows 14% per year - and low-emissions energy sources maintain their near-total share of the overall electricity mix amid this growth. The Energy Transition Plan sees solar power as the leading source of low-cost generation.

Can a mineral deposit strengthen Uganda's energy transition?

Deposits of critical minerals, if harnessed sustainably, could reinforce Uganda's own energy transition and contribute to economic growth. Strong partnerships will be key to seeing through the Energy Transition Plan, according to the analysis.

Can Uganda's energy advantages be leveraged responsibly?

The plan shows how Uganda's major energy advantages can be leveraged responsibly to meet our Government's broader objectives," said Ruth Nankabirwa Ssentamu, Uganda's Minister of Energy and Mineral Development.

On 26th September 2024, Uganda's President Yoweri Museveni officially inaugurated the country's largest power generation facility: the 600 MW Karuma Hydro Power ...

The heart of the Energy Transition Plan, which builds on Uganda's current energy policies, is expanding low-emissions electricity across the country. Uganda's grid is already ...

From June 30th to July 4th, 2025, the RVO delegation visited Uganda to see firsthand how the ABC project is increasing access to clean cooking, climate-smart farming ...

While grid energy is very expensive and not very reliable in rural Uganda, solar systems are also not cheap. Specifically, to provide uninterrupted power ...

While grid energy is very expensive and not very reliable in rural Uganda, solar systems are also not cheap. Specifically, to provide uninterrupted power supply, batteries are required with high ...

The heart of the Energy Transition Plan, which builds on Uganda's current energy policies, is expanding low-emissions electricity across the ...

LUWERO - The energy ministry has opened Uganda's first biogas and renewable energy technologies demonstration site at Ndejje University in Luwero district. The facility's ...

The Bidibidi demonstration site highlights the transformative potential of renewable energy to address interconnected challenges in refugee settlements and surrounding communities.

The Uganda Ministry of Energy & Mineral Development (MEMD) leads the Promotion of Mini-Grids for with support from the German Federal Ministry for Economic Cooperation & ...

Its primary aim is to promote sustainable use of energy for social economic empowerment, increased access to renewable energy and efficient utilisation of the existing energy resources.

This Knowledge Product focuses on stand-alone productive use of energy appliances for farmers and small businesses, such as solar water pumps/solar-powered irrigation systems (SPIS), ...

On April 5th, 2025, the historic Nyero Rock Paintings in Kumi District came alive with purpose as cultural royalty, government officials, clean energy advocates, ...

MNRE and ISA President Unveil Nine Solar Demonstration Projects in Uganda, Comoros and Mali Discussions during the meeting focussed that solar energy in Africa has ...

Korea Hydro & Nuclear Power signed a 26-month contract to assess a site in Uganda's Buyende region for its first nuclear reactor, in compliance with International Atomic Energy Agency ...

On 30th April 2025, Joint Energy and Environment Projects (JEEP), in Partnership with Heifer International Uganda, officially launched the Distributed Renewable Energy Ecosystems Model ...

Limited energy options hindered communities' possibilities for improving their livelihoods. These challenges led communities to seek assistance in finding solutions. Solar photovoltaic panels ...

With the new initiative "Green people's energy for Africa" by the German Federal Minister for Economic

Uganda New Energy Demonstration Site

Cooperation and Development (BMZ) and therein the potential Ugandan-German ...

Ministry of Energy and Mineral Development (MEMD) Uganda has granted ASX-listed Ionic Rare Earths approval for its demonstration plant at the Makuutu rare earths project.

ACODE and Heifer International Uganda with support from the Mott Foundation, are implementing the DREEM(Distributed Renewable Energy Ecosystem Model) Hub Pro...

International Solar Alliance (ISA) held its 5th regional meeting in Kigali, Rwanda. Nine solar power demonstration projects across three countries: 4 in Uganda, 2 in Comoros ...

home of Uganda's first Biogas laboratory and renewable energy technologies demonstration site. Housed at Ndejje University, the site showcases five renewable energy ...

By partnering with Energy America and EA Astrovolt, Uganda will harness world-class clean energy technology, foster local employment and skills development, and accelerate our ...

By Julius Mujuni, Country Director - New Energy Nexus Uganda I recently had the privilege of engaging with Otto Scharmer, a global thought leader in systems change. His call ...
