

Vatican invests in solar energy storage

Will Vatican City be able to use solar energy?

Catholic News Agency, 2024-06-26 Pope Francis has announced measures to transition Vatican City to using solar energy as its main source of electricity, as outlined in his latest motu proprio titled *Fratello Sole*, or "Brother Sun."

Why does the Vatican have a solar system?

The Vatican's solar shift is a culmination of a political and spiritual mission years in the making. In 2024, the late Pope Francis issued an apostolic letter ordering the construction of an agrivoltaic solar plant to supply the Vatican with energy from Santa Maria di Galeria. On the same site, the new solar infrastructure now stands.

Why did Pope Francis ask the Vatican to build a solar farm?

Pope Francis last year asked the Vatican to study developing the area into a vast solar farm, hoping to put into practice his preaching about the need to transition away from fossil fuels and find clean, carbon-neutral energy sources. Pope Leo XIV visited the site in June and affirmed that he intended to see Francis' vision through.

Will the Vatican build an agrivoltaic system?

The Holy Father has tasked the relevant Vatican governing bodies to collaborate with Italian authorities and build an "agrivoltaic system," which would use land in Santa Maria di Galeria, an extra-territory of Vatican City situated outside of Rome, for farming and solar energy production.

Why did Acea install a solar energy system in Vatican City?

This project was carried out by ACEA, an Italian utility company, which installed systems to meet all of the Vatican's energy demands. What makes this significant is not the size, but that Vatican City is only 0.49 km², and there was no loud campaign, no press tour, just action set in stone and implemented.

How will the Vatican's new energy system work?

According to the Vatican's press office, the installation will apply the most advanced solutions currently available, balancing clean energy generation with the preservation of agricultural use, the region's hydrogeological stability, and the protection of its cultural and archaeological heritage (ZENIT News / Rome, 08.01.2025).-

The project aims to meet the full energy needs of both the Vatican State and Vatican Radio using solar technology integrated with agricultural activity.

Italy agreed Thursday to a Vatican plan to turn a 430-hectare (1,000-acre) field north of Rome, once the source of controversy between the two, into a vast solar farm.

6 days ago; Octopus Energy is investing in three projects in Spain: two solar farms in Navarre and

Vatican invests in solar energy storage

Albacete, capable of generating a combined 100MW, as well as a battery storage project ...

New Energy Storage Technologies Empower Energy Development of New Energy Storage during the 14th Five -Year Plan Period, emphasizing the fundamental role of new energy storage ...

Empowering Your Future with Solar Energy At EK Solar Solutions, we are at the forefront of the solar energy revolution. With over a decade of expertise in the renewable energy industry, we ...

Battery energy storage: how does it work? Battery energy storage does exactly what it says on the tin - stores energy. As more and more renewable (and intermittent) generation makes its ...

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of ...
