

Vietnam portable energy storage power supply direct sales price

How does the power market work in Vietnam?

Vietnam's power market operates on a 30-minute trading system, with prices updated every half hour. This Full Market Price (FMP) reflects the real-time cost of power and is used to settle payments in the wholesale market. The FMP includes: System Marginal Price (SMP) - a dynamic price based on supply and demand.

Does Vietnam have a competitive power system?

Vietnam's move toward a competitive power system took a big step forward with the launch of its Wholesale Electricity Market (VWEM) in 2019. In this market, state and private generators sell electricity through a centrally coordinated system. Prices are based on real-time supply and demand, bringing more transparency and efficiency to the sector.

Does Vietnam have a power shortage?

Vietnam's total power demand is expected to grow 10% annually during the period 2021-2024, and power shortages are expected to increase in different regions of the country.
