

Western Chile Energy Storage Project

Where are Chile's battery energy storage facilities located?

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative regions have facilities in operation, under construction or in the planning stage. The greatest installed capacity is found in the northern regions of Antofagasta and Tarapacá, the country's solar powerhouses.

How many energy storage projects are in Chile?

Currently, 36 of the 129 large-scale projects Latin America projects with an energy storage component under development are in Chile, including 32 out of 71 of the region's early works projects. The storage technologies either in use or being considered include:

Will Chile's storage capacity double in 2032?

The energy ministry spokesperson told Dialogue Earth that the country's environmental assessment body is currently assessing the viability of 300 more storage projects, with a total capacity of 16 GW. According to some projections, between 2026 and 2032, Chile's total storage capacity could double to 4 GW.

Why is Chile pursuing energy storage in Antofagasta?

Chilean president Gabriel Boric (centre) at the inauguration of an energy storage plant in the northern region of Antofagasta in April 2024. Chile has strong conditions for wind and solar energy, and is pursuing storage to help overcome intermittent supply (Image: Ximena Navarro / Dirección de Prensa, Presidencia de la República de Chile)

Is lithium ion battery storage available in Chile?

While many projects are under development, lithium-ion battery storage is still limited. According to data from Acera, the Chilean Renewable Energy Association, there are only 64 MW of battery storage capacity currently active, representing 0.2% of national capacity.

Will Chile support the energy transition?

A spokesperson for Engie Group told Dialogue Earth that Chile is seen as one of its strategic countries for supporting the energy transition, which "entails the investment of USD 1.8 billion by 2027. Our plan in Chile considers incorporating 1.4 GW to reach 2 GW of installed capacity in clean energy, including 2 GWh in storage systems".

The technological diversity of energy storage projects in Chile is remarkable. From battery storage systems to innovative projects with gases such as CO₂, the country is exploring different ...

Chile plans to deploy five gigawatts of battery storage capacity by 2030, together with the commissioning of the 3 GW Kimal-Lo Aguirre high-voltage direct current transmission ...

Western Chile Energy Storage Project

Western Chile wins its first battery projects in Belgium, Chile's energy storage sector got a boost during COP26 when the country's government announced a US\$400 million partnership with ...

Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and battery energy ...

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022. ...

Having launched a national storage strategy in 2023 that sets targets and aims to attract investment in the sector, and with a large pipeline of projects on the way, Chile's ...

As frequent readers of Energy-storage.news might know, the majority of BESS projects built and in construction in Chile are paired with a solar PV project. Although a ...

José Ignacio Escobar, CEO of Colbún, stated that the partnership with e-STORAGE positions Colbún as a leader in Chile's energy storage market, supporting a ...

If you're in the energy storage game, Chile's 2025 tender announcement is like spotting a rare bird in the Atacama Desert--exciting and packed with potential.

Furthermore, a hydrogen energy storage project, developed by HIF Chile, is in the planning stages within the Magallanes-Chile Antarctic Region.

By the end of March 2025, the country had 954 MW of operational energy storage capacity, representing 48% of its national target of 2 GW by 2030. This progress highlights ...

Having launched a national storage strategy in 2023 that sets targets and aims to attract investment in the sector, and with a large pipeline ...

Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and battery energy storage systems (BESS).

Zelesa, a global, multi-technology, customer-focused renewable energy company, has signed a major agreement with Sungrow to provide cutting edge battery storage ...

The technological diversity of energy storage projects in Chile is remarkable. From battery storage systems to innovative projects with gases such as CO₂, ...

Why Chile's Latest Tender Is a Big Deal for Renewable Energy Buffs If you're in the energy storage game, Chile's 2025 tender announcement is like spotting a rare bird in the ...

Western Chile Energy Storage Project

The significant deal will see the supply of Sungrow's PowerTitan 2.0 liquid-cooled Battery Energy Storage System and supply of Sungrow's MV Power Conversion Unit for the 1 ...

Located in the northern region of Atacama, the Domeyko Solar + Battery Energy Storage System (BESS) project is currently under construction. The project is expected to ...

2 days ago; A hybrid energy storage project in western Kern that was approved for federal financial support under the Biden administration has managed to survive under the Trump ...

The number of ongoing and planned energy storage projects in Chile reached 85 by August 2023, with their capacity totaling 6.4 gigawatts (GW), PV Magazine reports.

Energy Storage AES is the world leader in lithium-ion-based energy storage, both through our business project and joint venture, Fluence. We pioneered the technology over one decade ...
