What are the safety requirements related to batteries & Battery rooms?

Employers must consider exposure to these hazards when developing safe work practices and selecting personal protective equipment (PPE). That is where Article 320, Safety Requirements Related to Batteries and Battery Rooms comes in.

Can a lithium energy storage system be used in an occupied facility?

[C]4-8.2 UFC 3-520-01 prohibits the use of any type of lithium energy storage system in an occupied facility. This UFC technical section does not exempt the use prohibition in UFC 3-520-01.

Do battery cabinets need a fire rated partition?

The partitions separating the battery cabinets or open battery racks will help limit the spread of a fire from one battery or battery system to another. The partitions need to be floor to ceiling/roof/floor above. Any penetrations need to be firestopped for an hour rating. The partitions are not going to be a true fire rated partition or fire wall.

Do you need documentation before entering a battery room?

It is a requirement to have all the documentation in place prior to authorized personnel entering a battery room to perform a specific work task on a battery system under normal operating conditions. However, it is likely the employee will need to enter the battery room to deal with a battery system that is not operating normally.

Can a battery be placed in an ESWC?

The system's output may be able to be placed into an electrically safe work condition (ESWC), however there is essentially no way to place an operating battery or cell into an ESWC. Someone must still work on or maintain the battery system. Working on a battery should always be considered energized electrical work.

What type of gypsum board do you need for a battery rack?

The partitions must be constructed of masonry units. The partitions need to extend 6 inches (150 mm) beyond the cabinet or open battery rack. For cabinets that meet UL 9540A, the partitions can be constructed of one layer of 5/8-inch Type X gypsum board on both sides of noncombustible studs.
