

What size mobile outdoor power bank should I buy

How much Mah does a power bank have?

Power banks are available in a wide range of capacities, from as little as 1000 mAh to as much as 50,000 mAh or more. However, it's worth noting that as the mAh capacity of a power bank increases, so does its physical size and weight - which can be a serious detriment in the backcountry or while traveling. Bigger is not always better!

What size power bank should I buy?

The most common power bank size right now is the roughly 10,000 mAh size, like this one. This power bank tends to be about the same size as a smartphone and that makes it attractive just by itself. Power banks like this one will give you up to four charges for your average phone and that makes them a good choice for traveling.

Should you buy a 5000 mAh power bank?

For example, if you have the Google Pixel 8a, the Miiso 6,000 mAh portable charger should be good for backup. However, if you have a smartphone with a large battery or a laptop, opting for a heavy-duty power bank is wise. However, it's not as simple as buying a 5,000 mAh power bank to charge a 5,000 mAh smartphone. Life should be that simple, no?

How much does a power bank weigh?

Another new-age power bank like the Anker 737 -- which has a capacity of 24,000 mAh -- has a compact shape and weighs around 1.4 pounds. Besides that, it has USB-C fast charging ports. Note that conventional heavy-duty power banks take a long time to charge fully.

How many mAh power bank should a laptop have?

Again, for a standard laptop, a 20,000 mAh power bank with a compatible USB-C PD port is the minimum requirement. You can also look at 30,000 mAh or 50,000 mAh power banks. On the other hand, if you are planning to go camping/hiking, it's best to rely on a heavy-duty power bank.

How are power banks rated?

Most power banks are rated in terms of their maximum output current, which is the maximum amount of current that they can deliver at any given time. The output current, in conjunction with the mAh capacity, determines how many times your device can be charged and how quickly it can be charged.
