What is the best portable power station?

It even has enough power and capacity in the tank to charge electric vehicles. If there were such a thing as a perfect portable power station for all needs, this would be it. The Anker SOLIX F3800 Plus is the portable battery system that does it all.

What is a portable power station?

A truly portable power station will be light and small, but it won't be able to do as much as the huge ones. It all depends on what you need. The smaller power stations are usually great at charging phones, tablets, powering small appliances, etc.

Which power station should I buy?

If what you want is to store the most juice possible in a single power station, this is your best bet. The Anker SOLIX C300 is a reliable power station for your small electronics. 300W of output will charge your phones and laptop with ease, and 288Wh should keep you going all weekend.

Are portable power stations democratizing power on the go?

The proliferation of portable power stations is democratizing power on the go. These batteries are great for keeping your devices powered, but they come in different sizes, prices, capabilities, and port options. How do you know which are the best power stations for your specific needs? I've been testing and researching all the hottest ones.

How do I choose a power station?

Look into the weight and size of your power station, and also consider whether you will want it to have wheels and/or a handle. Port selection: This one usually gets me. Sometimes huge and expensive power stations don't have many ports, and often the smaller units can even beat them in port selection.

Can a power station handle wattage?

Even if your power station can handle an appliance's wattage, it will be useless if it can only do so for a few minutes. In power stations, battery capacity is typically measured in Wh (watt hours). To put things into perspective, a phone has about 5-15Wh of capacity. A smaller full fridge can use about 300Wh in one hour.
