Why are my widgets blank on iOS 15?

If the widgets blank issue exists after trying all the methods, it might be a bug of iOS 15 or the app with widgets. We suggest you feedback the issue to Apple and wait for the next official update. If the App is a third-party one, you can also feedback to the provider and ask them to test the compatibility with iOS 15.

Why are widgets not working on iOS 18?

Why Aren't Widgets Working on iOS 18.5? The forums are flooded with reports from users saying widgets from various apps aren't working on iOS 18. This issue makes some apps less convenient to use since you can't access their content directly from the Home Screen. The main culprit is the incompatibility of certain apps with iOS 18.

Which apps use legacy widgets?

There's no official list of apps that use legacy widgets, so you'll need to do some research online to find out which of your favorite apps are affected. If widgets are not working on your iPhone running iOS 18.5, check out this article to find out why and what you can do to fix it.

Why are my widgets not loading after iOS 15 update?

If your widgets not loading after the iOS 15 update, there might be a problem with the apps. Thus, you can try to remove and reinstall apps to fix the issue. At first, please make sure you have backed up the data in the app you need to install. Then, press and hold the app on your home screen.

Can I access widget content from apps locked with Face ID?

One such limitation is that you can't access widget content from apps locked with Face ID. This restriction makes sense--there's no point in locking an app if its content can still be accessed through widgets. However, you'll need to choose between locking the app with Face ID or having its widget available on the Home Screen.
