

Yemeni coal-to-electricity energy storage equipment manufacturer

What is the future of electricity in Yemen?

In Yemen, the future of electricity involves increasing access and renewable energy. As of 2010, less than half of the population has access to electricity. The government launched a National Strategy for renewable energy and energy efficiency, targeting a 15% share of renewable electricity generation by 2025.

What type of electricity is used in Yemen?

Renewable electricity here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal power. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings.
